Coral

Coral is a designer pendant inspired by nature and geometric polyhedra. Coral was David's first launched lighting design which has informed the basis of all of our lights since! Coral has won numerous awards around the world and to date it is still our most popular design, some consider it a design classic.

Floral 600mm.

Floral

Floral was the second production light to be launched (after Coral), following an exploration by David into softening Coral's 'geometric feel'. If you look at the central junction of five of the shapes - you can see a pattern of a flower emerge. Floral has more organic language than Coral, whilst keeping the same structured and fragmented skin.

The form of our Kina light comes from the shell of a sea-urchin, which in New Zealand is called Kina by the indigenous Māori people. David saw one frozen under the Antarctic ice during a visit there in 2004.

Hinaki

Hinaki was David's first exploration into lighting in 1995 when he made a prototype based on fish traps which are called hinaki by Māori. Hinaki traps were made from woven vines, some in amazingly beautiful forms.

Flax

Flax Pendant is based on the long slender leaves of the indigenous flax plant or harakeke in Māori that has long been grown for its valuable fibre. There is a Māori proverb about preserving important resources: If you cut the central stalk of the flax bush, where will the bellbird feed?

Sola 800mm.

Sola

Based on the same geometry as Coral and Floral with more connection points, creating an intensely intricate pattern. Designed as part of our Icarus installation (shown in Milan) which is based on the Greek myth about the boy who flew too close to the Sun. Sola represents the Sun which will get too hot if you fly too high.

Kōura Table Lamps.

Table Lamps

A powder-coated aluminium component which allows the fitting of our Coral 400mm/16", Kōura 500mm/20", and Floral 400mm/16" to a lamp base. The component is available in black and white options and comes with nylon fittings. These smaller lights make great table or bedside lamps, casting shadows against nearby walls.

Tūi Medium.

Tūi

Tūi are the real characters of Aotearoa's native bush. They hurtle through the bush with drumming wing-beats, miraculously avoiding branches whilst maintaining their cool charm. Their song is like no other: a series of clicks, gurgles and resonant, bell-like notes...some off our hearing scale! They have two dangling white wattles on their throats and around their shoulders is a necklace of interwoven rings which is the inspiration of our Tūi light. Half rings of bamboo are woven into a basket form that would sit perfectly over a dining table, kitchen counter or equally hanging in a stairwell or entrance void.

Maru

The effect of shadow play on surrounding walls and ceiling is Maru's hidden quality. The circular form is inspired by diatoms which are at the base of the entire oceanic food chain. The name Maru is found in both New Zealand Māori and Japanese languages, with references to the cycle of life.

Basket of Light, (Leaf).

Baskets of Light

The story of the Baskets of Light is based on a Māori myth in which three baskets were used to bring knowledge down from the gods to the people of the land. Originally released in 2009, we have redesigned them to exclude plastic and this positive movement will give them a new life...and a more sustainable one!

Cloud lights were first launched in 2008 as part of the Spiral Islands installation of matching lights and settees. This was inspired by the clouds that David saw sitting over small islands all over the Pacific Ocean, which were used by Polynesian navigators to find islands from afar.

Swell light.

Bounce light.

Roll light.

Ebb

The original design for the Ebb family came from the sketches of light-play on water ripples that David observed on his travels. Ebb is all about a directional arc that arrays around four different design forms. Ebb lights were first launched as fully assembled lamps made from plastic and wood components. In 2020 they were re-launched again and now the Ebb family of Swell, Drop, Roll and Bounce are made from ultra thin (0.7mm) Finnish birch plywood.

Hush

Hush (designed with PLN Group) is an award-winning family of acoustic lights which absorb noise and reverberation to create a more peaceful environment. Place Hush over an individual task desk, a group of desks, meeting table or focus space to aid in softening sound and reducing reverberations. This allows teams to collaborate while also aiding individuals to focus – free of distractions. The lightweight, semi-rigid acoustic panels help mitigate the impact of noise in an open-plan environment.
