BORDO MARE

Tutti i prodotti Lombardo con bollo Bordo Mare presentano un ciclo di verniciatura certificato per una durata superiore alle 1200 ore in nebbia salina che consiste dei seguenti passaggi:

- 1) Trattamento Gardo®Flex di protezione superficiale con deposizione di fosfati. Bagno a 60°C che sigilla le microporosità dei manufatti in alluminio stampati con uno strato inorganico di Zinco-fosfato.
- 2) Trattamento CathoGuard® con elettrodeposizione di resina epossidica nera. Bagno a 30°C e cottura a 160°C per rivestire il manufatto di un primer sigillante di 30 micrometri che migliora le proprietà di resistenza in nebbia salina.
- 3) Ciclo di verniciatura a polveri di poliestere ad alta resistenza ai raggi UV.

All Lombardo products with the Bordo Mare (Sea Treatment) mark have a certified salt spray coating cycle lasting more than 1200 hours, which consists of the following steps:

- 1) Gardo®Flex surface protection treatment with phosphate deposition. A 60°C bath that seals the microporosity of the moulded aluminium parts with an inorganic layer of zinc phosphate.
- 2) CathoGuard® treatment with electrodeposition of black epoxy resin. Bath at 30°C and bake at 160°C to coat the part with a 30 micrometre sealing primer that improves salt spray resistance properties.
- 3) Polyester powder coating cycle with high UV resistance.

Tous les produits Lombardo portant la mention Bordo Mare (Bord de Mer) sont soumis à un cycle certifié de revêtement au brouillard salin d'une durée supérieure à 1200 heures, qui se déroule selon les étapes suivantes:

- 1) Traitement de protection de surface Gardo®Flex avec dépôt de phosphate. Un bain à 60°C qui scelle la microporosité des pièces moulées en aluminium avec une couche inorganique de phosphate de zinc.
- 2) Traitement CathoGuard® avec électrodeposition de résine époxy noire. Bain à 30°C et cuisson à 160°C pour recouvrir la pièce d'un apprêt scellant de 30 micromètres qui améliore les propriétés de résistance au brouillard salin.
- 3) Cycle de peinture en poudre polyester à haute résistance aux UV.

OUR PHILOSOPHY

ENG EXPLORE TO KEEP

GROWING: A PATH THAT HAS ALWAYS FASCINATED US. The project is one of the most fascinating moments in everyone's life and its completion is something unique, the link between the imagination and the reality. Inside LOMBARDO the design laboratory opens new paths. Innovation and design become part of the company DNA, both using internal resources and external contributions, to exploit positive contaminations. What brings this work into life is the intuition of the designers, who are able to integrate light technologies in unusual shapes and materials, but always technically appropriate. Finally, there is a style, an intelligent and easy product one, whose value is perceived directly and almost instinctively by those who "meet" it.

RELIABILITY DIMANISM SIMPLICITY

IT ESPLORARE PER CONTINUARE

A CRESCERE: UN PERCORSO CHE CI AFFASCINA DA SEMPRE.

Il progetto è uno dei momenti di maggior fascino nella vita di ognuno, e il suo compimento qualcosa di unico, l'anello di congiunzione fra immaginazione e realtà. Innovazione e design sono parte del nostro DNA. A dare anima a questo lavoro è l'intuizione dei designer, capaci di integrare tecnologie della luce in forme e materiali inconsueti, ma sempre tecnicamente appropriati. Infine c'è uno stile, lo stile di un prodotto intelligente e allo stesso tempo easy, il cui valore percepito direttamente, quasi istintivamente da chi lo "incontra".

Ce qui donne une âme au travail de Lombardo, c'est l'intuition des concepteurs, capables d'intégrer les technologies de la lumière dans des formes et des matériaux inhabituels, mais toujours techniquement appropriés. Enfin, il y a un style, celui d'un produit intelligent et en même temps easy, dont la valeur est perçue directement, presque instinctivement par ceux qui le "rencontrent".

ENG INSIDE

LOMBARDO THERE IS A DESIGN LABORATORY THAT OPENS NEW PATHS. Innovation and design become part of the company DNA, using both internal resources and external contributions, to exploit positive contaminations. To create a quality luminaire, one works on two levels: the shape of the luminaire and the light effect generated. The result is unique and deliberate: a form of skilful creativity. The Italian tradition has set the standard and each of our products is authentically "made in Italy."

WE LISTEN TRANSVERSAL CURIOUS

IT ALL'INTERNO DI LOMBARDO SI CONFIGURA UN LABORATORIO PROGETTUALE CHE APRE NUOVE STRADE.

Innovazione e design entrano a far parte del DNA aziendale, utilizzando ora risorse interne, ora contributi esterni per sfruttare contaminazioni positive. Per realizzare un apparecchio illuminotecnico di qualità si lavora su due livelli: la forma del corpo illuminante e l'effetto luce generato. Il risultato è unico e voluto: una forma di sapiente creatività. La tradizione italiana ha fatto scuola e ogni nostro prodotto è autenticamente "made in Italy."

TREND USD 60 BLADE

A photograph of a modern building at night. The building has a dark, textured facade. A large, rectangular window is visible on the left side, showing a warm interior light. On the right side, a minimalist, white, rectangular light fixture is mounted on the wall. It emits two beams of light, one pointing upwards and one pointing downwards, creating a dramatic effect. The sky is dark, and the overall atmosphere is modern and sophisticated.

Il sensore rileva i movimenti delle persone. Se un movimento è rilevato nel suo campo di rilevamento, la luce si accende per il tempo impostato. Tutti i movimenti che interverranno durante la durata definita attivano il sensore.

ATTENZIONE: il rilevamento è possibile attraverso le porte, muri e pareti di sottili lastre di vetro.

Le persone o gli oggetti che si muovono verso il sensore sono meglio rilevati. La distanza tra due rilevatori deve sempre essere superiore al raggio del campo di rilevamento.

Il cablaggio è polarizzato è quindi necessario rispettare le polarità Fase e Neutro .

NOTA: in caso di utilizzo con delle sorgenti luminose fluorescenti compatte E27 è necessario assicurarsi che queste siano di tipo ON/OFF UNLIMITED (ACCENSIONI ILLIMITATE); inoltre è consigliabile impostare una temporizzazione che assicuri un'illuminazione di 5 min minimo al fine di evitare un'usura prematura.

LOMBARDO S.r.l. non risponde di danni a cose e persone imputabili a modifiche, manomissioni o impiego non conforme alle caratteristiche tecniche del prodotto.

The sensor detects the movements of persons. If a movement is detected within its detection area, the light will start for the defined time. All movements during the defined time activate the sensor.

CAUTION: detection is possible through doors, walls and thin glass panes.

Persons and objects moving towards the sensor are better detected. The distance between two detectors has to be always higher than the radius of the detection area.

The wiring is polarized and therefore it is necessary to respect the polarities Phase and Neutral.

NOTE: In case of use of compact E27 fluorescent lamps, it is necessary to assure that they are of UNLIMITED ON/OFF type; furthermore, it is recommended to install a timer assuring minimum 5 min. lighting in order to avoid early wear.

LOMBARDO S.r.l. is not liable for damage to property and people due to modification, tampering and use not in conformity with the technical characteristics of the product.

Le sensor détecte les mouvements des personnes. Si un mouvement est détecté dans son champ de détection, la lumière s'allumera pour la durée définie. Tous les mouvements qui interviennent pendant la durée définie vont activer le sensor.

ATTENTION: la détection est possible à travers les portes, les murs et les parois de plaques de verre fines.

Les personnes et les objets en mouvement vers le sensor sont mieux détecté. La distance entre deux détecteurs doit être toujours supérieure au rayon du champ de détection.

Le câblage est polarisé donc il est nécessaire de respecter les polarités Phase et Neutre.

NOTE: En cas d'utilisation avec des sources fluo-compacte E27 , il est nécessaire de s'assurer que celles-ci soient de type ON/OFF UNLIMITED (on/off illimité); il faut en outre mettre une temporisation assurant un éclairage de 5min minimum afin d'éviter une usure prématurée.

LOMBARDO S.r.l. n'est pas responsable des dommages aux biens et aux personnes en raison de modifications, manipulations ou utilisation non conforme aux caractéristiques techniques du produit.

Direttiva RAEE: Rifiuti di apparecchiature elettriche ed elettroniche

Il 25 Luglio 2005 il Consiglio di ministri ha recepito con Decreto Legislativo N°151 la Direttiva Europea 2002/96/CE relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche e dello smaltimento dei rifiuti da essi derivanti. L'obiettivo è promuovere una logica di sviluppo sostenibile nel settore delle apparecchiature elettriche ed elettroniche, di cui gli apparecchi di illuminazione ne fanno parte, ai fini di un corretto trattamento dei prodotti a fine vita e ciò può attuarsi attraverso la piena conformità alla Direttiva RAEE.

Il Produttore, come definito dal Dlgs n°151, dovrà farsi carico dei costi di gestione che comprendono la raccolta, presso gli impianti di stoccaggio provvisorio e dello smaltimento dei rifiuti degli apparecchi di illuminazione immessi sul mercato.

Per adempiere a questi obblighi di legge Lombardo S.r.l. ha deciso di avvalersi del Consorzio ECOLIGHT. Gli apparecchi di illuminazione saranno marcati in modo da identificare il Produttore e riportare il simbolo del cassonetto barrato, indicante la raccolta differenziata separata dal resto dei rifiuti urbani. Gli apparecchi illuminanti all'interno del presente listino/catalogo, con esclusione degli accessori, saranno soggetti al contributo di smaltimento in base al loro peso netto e si suddividono in tre fasce:

Fascia 1:

Apparecchi il cui peso è compreso tra 0 e 2 Kg.

Fascia 2:

Apparecchi il cui peso è compreso tra 2 e 8 Kg.

Fascia 3:

Apparecchi il cui peso è superiore a 8 Kg.

Direttiva RoHS

Il Decreto Legislativo sopra menzionato incorpora anche la Direttiva 2002/95/CE - RoHS - Limiti d'uso di alcune sostanze pericolose - relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche. A partire dal 1° Luglio 2006 tutte le nuove apparecchiature elettriche ed elettroniche immesse sul mercato non dovranno contenere o contenere in misura limitata sostanze quali: Piombo - Mercurio - Cadmio - Cromo esavalente - Bifenile polibromurati (PBB) - Eteri difendi polibromurati (PBDE).
