

Occhio

live your individuality

Individuality requires free space. A perfectly calibrated interplay of light and dark, of diffuse and focused, of direct and indirect light gives character to rooms. And because the requirements for light can change depending on the situation, Occhio's modular luminaire systems offer outstanding freedom of design – always in keeping with the highest quality of light and a holistic design concept.

create something extraordinary

Our benchmark for perfect light is sunlight. At home or in the work environment: Occhio's exceptional quality of light provides the right light for every situation. Precise, glare-free optics represent the ultimate in lighting comfort. And with the Mito series, »color tune« allows the color temperature to be adjusted from atmospheric warm light to energizing cool light – the entire spectrum of light to let your creativity unfold.

feel the ease

At Occhio, operating the luminaires becomes a true experience. With »touchless control«, it only takes an intuitive gesture to turn a luminaire on or off, dim it, direct it upward or downward, or change the light color. As an alternative, you can operate the luminaires by using an app or a controller. Occhio air can control individual luminaires or arrange entire lighting scenes easily and comfortably.

enjoy beauty

At Occhio, beauty and quality are visible in the design of the luminaires as well as in workmanship, surface finishes – and intuitive functions. The passionate commitment to aesthetics, attention to detail and a holistic way of thinking perfectly accentuate the harmony of the interior design, in terms of both – look and function.

Mito largo bronze, Mito sospeso 60 matt gold, Mito sospeso 40 rose gold

Mito largo

The perfect balance between
purism and extravagance

Mito largo black phantom

Individuality is not just a matter of aesthetics

... but also of possibilities. Mito largo not only underscores your sense of extraordinary aesthetics, it can also be precisely set up to your individual situation.

height setting

Passion for function

Via gesture control, »body sensor« or Occhio air, the light of Mito can be steplessly directed from one side to the other. In that way, fascinating new possibilities of room atmospheres are created that inspire people.

»up/down fading« for Mito floor and suspended luminaires, Mito aura as well as Sento with double sided light output.

Mito sospeso

Room for great ideas

It has to be perfect ...

Thanks to the sophisticated reel mechanism, the pendant length of Mito sospeso can be adjusted whenever necessary. A slight nudge upward or a gentle push downward moves the luminaire to the desired height – and it remains balanced at all times.

height adjustment (optionally available for all Occhio pendant luminaires)

... to be simple

Mito sospeso 60 rose gold

Mito sospeso 40 matt gold

The magic of touch

One gesture is all it takes: With Occhio »touchless control«, light can be switched, dimmed and faded upward or downward with simple movements of the hand. All without switches, dimmers and the like.

»touchless control« for Mito floor and suspended luminaires, Mito aura, Mito sfera as well as Sento and io 3d.

Mito soffitto

Sense and sensuality ...

... in perfect harmony

color tune

It's nice to have the choice

Via gesture control, »body sensor« or Occhio air, the light of Mito can be steplessly directed from one side to the other. In that way, fascinating new possibilities of room atmospheres are created that inspire people.

Mito soffitto 40, 60 matt gold

Mito sfera 60 bronze

Mito sfera

You've got the look

For more than 100 years, the theater mirror with bulbs around the frame was unrivaled for stars seeking the perfect light for their reflections. Mito sfera takes this further. Much further »touchless control« for dimming and colour temperature adjustments make the mirror's light an experience. And you a star.

Mito sfera corda 40 phantom (with plug connection)

Mito aura

Complete. Weightless.

up/down fading

Mito aura

Infinite ...

Like a spaceship, Mito aura appears to float in the room. As it does, it will amaze you with the fascinating lighting effects it emits. You can create your very own lighting atmosphere by independently controlling the up and down light. Mito aura – infinite possibilities!

Mito aura 60 phantom

... desirable

As a wall luminaire, Mito aura takes on the qualities of a work of art – attracting the attention and awe of all who see it. It enables you to change the ratio of direct and indirect light as well as the color temperature at any time – by using Occhio air or a simple gesture.

Mito linear

Linearity is a matter
of personality

Simple. Spectacular.

Mito volo reinterprets the idea of suspended luminaires in a completely new way. Radically linear, crafted down to the very last detail, continuously height adjustable, powerfully illuminating up- and downlight, intuitively controlled by gestures or an app – Mito volo is designed to create the perfect light for any situation and you can fully enjoy the atmosphere, the space and the moment.

The fourth dimension of architecture

Mito alto side expands the possibilities of lighting design with the impressive wallwash effect. Vertical surfaces are homogeneously illuminated to highlight the sense of space.

Mito terra 3d rose gold

A window seat when and where you want it

Mito terra 3d produces a quality of light that could easily be compared to the sun. The subtle difference: The direction, color and intensity of the light produced by Mito terra 3d can be controlled and perfectly set to meet your particular need. It is up to you – also when it comes to the optimal arrangement of luminaires at your workspace.

Only for you

The integrated »presence sensor« of Mito terra reacts to your presence or absence in the room and ensures a comfortable and efficient lighting control in combination with »ambient light control«.

Gloia

To those who strive
for new horizons

infinite move

To the movers and shakers

Brightness always precisely where you need it. Light as you want it to be. Endless mobility that fascinates twice over: the head and body of Gioia can turn freely and playfully vary their heights. On top of this, the sculptural appearance changes with every movement. And there's more: gesture control of up- and downlight and changeable light color via »color tune« give you maximum freedom.

Gioia equilibrio phantom

up/down fading

focus light

Your wish is its command

Whether powerful room light or atmospheric reading light – Gioia leaves nothing to be desired: light that responds to your gestures. You can freely direct it up and down to create the perfect atmosphere and effortlessly move it as needed – with your preferred degree of focus thanks to »focus light«.

Taglio

Light years ahead

Tomorrow's ideas in the best light

Striking, linear and fascinatingly flexible: Taglio combines a clear design language with maximum ease of use – and opens a new chapter for the design and use of table luminaires in form and function.

Wish ...

Are you dreaming of the perfect reading luminaire? A luminaire that, thanks to its flexibility, can be precisely adjusted to suit the situation? With an absolutely glare-free lens optic that can create a warm atmosphere or powerful luminance depending on your wishes? Which only requires one gesture to be turned on/off and dimmed, or even to direct the light upward or downward? Sometimes a dream becomes reality.

...and reality

Sento lettura matt white

Sento terra matt black

choose your light

One system – no limits

The modular body-head principle used by Sento makes it all possible: With a comprehensive range of floor-, wall-, ceiling- and suspended luminaires, you can place the luminaire head exactly where you want it. Thanks to modular exchangeable optical components such as lenses, inserts and color filters, the perfect lighting effect can be configured for any situation – now and anytime!

Always a stunning experience

»up/down fading« makes it possible: Luminaires with double sided light output enable unrestricted upward and downward direction of light in the room. That creates entirely new possibilities for changing the lighting atmosphere – anytime! The luminaires are operated by »touchless control« or Occhio air.

Artistic freedom

Sento sospeso

Only flying is better

The nicest cable reel in the world

Height adjustment with unparalleled convenience: Sento sospeso floats at any desired height – so you can playfully adjust your light any way you like. The cables disappear from view into the canopy.

We put light into your hands

With the Bluetooth-based light-control system Occhio air, you can manage light simply and intuitively – from anywhere, regardless of the house automation system, you may have installed. Using a tablet, smartphone or controller, you can operate all luminaires with a simple touch. Change the atmosphere of your environment with a simple press of the button. Thanks to its easy setup, Occhio air provides you with customized design possibilities that can be modified at any time: Working with light becomes a playful pleasure.

app

A totally new dimension of operating comfort. With Occhio air, you can control single or groups of luminaires, either individually or synchronously. Or store your customized lighting scenes in order to retrieve them again with one touch.

controller

With the Occhio air controller, you can control the luminaires and the lighting mood of a room as you are used to from a classic switch – on the wall or with a mobile option. The controller is set up by using the Occhio air app. It then works completely on its own. Luminaires, groups and scenes can be controlled throughout the house with the press of a button – completely without the help of a tablet or smartphone.

Philosophy

We turn people into the lighting designers of their personal space

Light from Occhio represents an invitation to enjoy and feel, to create something extraordinary and to find expression in your own individuality.

With Occhio's unique, holistic philosophy we create a new culture of light. That's how we enable people to become the lighting designers of their living spaces and enhance their quality of life with quality of light.

Axel Meise, founder and chief designer of Occhio

we create
a new culture
of light

- Living 
- Office 
- Shop 
- Health 
- Hospitality 

The holistic concept of Occhio achieves its full impact when it is used comprehensively. The unique consistency in design, light quality and control enables users to holistically design situations, rooms and buildings in both private and public settings with the highest quality of light.
