Authors

BIG - Bjarke Ingels Group

BIG is a Copenhagen, New York, London and Barcelona based group of architects, designers, urbanists, landscape professionals, interior and product designers, researchers and inventors. The office is currently involved in a large number of projects throughout Europe, North America, Asia and the Middle East.

BIG's architecture emerges out of a careful analysis of how contemporary life constantly evolves and changes. Not least due to the influence from multicultural exchange, global economical flows and communication technologies, that all together require new ways of architectural and urban organization. They believe that in order to deal with today's challenges, architecture can profitably move into a field that has been largely unexplored. A pragmatic utopian architecture that steers clear of the petrifying pragmatism of boring boxes and the naïve utopian ideas of digital formalism. Like a form of programmatic alchemy, they create architecture by mixing conventional ingredients such as living, leisure, working, parking and shopping. By hitting the fertile overlap between pragmatic and utopia, they once again find the freedom to change the surface of our planet, to better fit contemporary life forms.

PATENT OF
INVENTION

“The flexibility enables us to move
and interact with the environment
in new and unpredictable ways.
The possibilities are endless!”
BIG

in (IP20)

La Linea is inclusive

La Linea turns light into an ideal fixture for outdoor spaces, architectures, parks, or public and urban areas to requalify common spaces, create social and engaging landscapes, and promote relations between people and their surroundings.

La Linea
Ø40 x 2500/5000 mm

-20°

La Linea is flexible

La Linea is a flexible tube of light, capable to freely twist and turn in space according to undefined geometries.

Light at 360°

Patented optic
mixing chamber

La Linea is innovative

Its patented section brings together several types of intelligence connected with optical, as well as material, mechanical, manufacturing principles and sustainable values, which take care of each individual aspect of the product's life stages.

Endless applications

BIG
BJARKE INGELS GROUP

La Linea Suspended Back Bone

La Linea is a basic principle that generates an open system and a comprehensive relation with space and humans.

It easily fits into indoor and outdoor spaces by leveraging on an unprecedented combination of factors, including quality of light, IP protection grade, flexibility, modularity. BIG's idea is once again transposed, thanks to the know-how of Artemide, into a product that looks basic but it is rich of technological innovation.

Back Bone is a Line with an aluminum back bone is possible to suspend La Linea modules creating linear or curved geometries in custom composition.

La Linea 25

La Linea 25

La Linea 25 increasingly becomes a communicative as well as a functional tool, adding values and meanings to its light through the expressiveness of its graphic sign.

It has excellent light performance in terms of quantity and quality, allowing not only the characterisation of a space but also its correct lighting.

The slim section with lengths of 5, 10 and 20 meters can be overlapped to create weaving and leaving the freedom to follow complex geometries like figures created by a single line. It combines innovation with emotion, liaising with man-built and natural spaces in which it is applied. It is sustainable, reconfigurable and long-lasting.

La Linea 25

La Linea is compatible with **Artemide App**

Artemide App is a user-friendly and intuitive interface used to control individual products, groups of appliances and lighting scenarios. It is a tool that can be associated with several products from both the Design and the Architectural Catalogues.
