INTRODUCTION

Our surroundings and the spaces we occupy have the ability to alter and define the way we live our lives. Whether a busy working office, hotel dining room or shared outdoor space, each environment has the potential to uplift and inspire, bringing a sense of comfort to all who inhabit them.

Working with a collective of designers, our desire at &Tradition is to create pieces that will stand the test of time – taking care to curate a collection of furniture, lighting and objects that elevate and enhance every setting.

As we guide you through the scope of our collection – from expansive seating configurations which encourage conversation and connection, to outdoor furniture pieces designed to sit in harmony with the natural world – we aim to provide convenient solutions tailored to suit every circumstance.

Allwood AV35 in Oak

IMPACT

Since we opened our doors in 2010, our intent has been to deliver a curated collection of purposeful designs which have been made to last. With it, we celebrate the culture of bonding with timeless, reliable pieces, reclaiming them in different contexts throughout your life, and caring for them as they age.

However, our vision as we grow and learn is to keep setting and meeting ambitious goals with the wellbeing of the people around us and respect for the planet at the forefront. We acknowledge the shared responsibility we have to limit the negative impact of our designs, and a duty to ensure a fair balance in the interests of people and planet.

Carbon emissions summary

To streamline our collective efforts towards halting global warming, we are working towards a decarbonisation strategy. This starts with taking account of current CO₂e emissions across the brand operations and supply chain and identifying opportunities to reduce.

In order to assist our clients in completing their CO₂e reports, we are able to provide CO₂e summaries for projects upon request.

We calculate the estimated lifetime CO₂e emissions of our products using a carbon calculation tool developed specifically for the furniture industry.

The calculation takes into account the full material composition of a product, component origin, packaging, transportation from the production facility and to the customer's region.

This climate footprint report is calculated according to EUs rules for Product Environmental Footprint (PEF). The summary will assign a CO₂e amount to the item within the order along all life stages, including production waste, use stage and disposal.

Please get in touch with your sales contact for more information.

OFFICES

With long-term durability in mind, our extensive range of tables and chairs promote efficiency and a simplified approach to working. Meanwhile, our collection of portables, pendants, wall, table and floor lamps illuminate spaces with style and functionality.

From Hee Welling's Rely chairs and Drip tables, to a large and highly customisable selection of sofas, each piece is designed to support a range of working styles and purposes, fitting seamlessly into offices and meeting rooms alike.

OUTDOOR

Embrace the art of alfresco living with the refined silhouettes of our outdoor collections that effortlessly intermingle with their surroundings.

From the sculptural yet geometric profile of the Thorvald series, to the soft solidity of the Ville range – it is easy to configure arrangements that maximise time spent together out in the open and create an embracing foundation for socialising and spending time together.
